DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The instant invention is distinguished over the prior art of record by providing a process for forming a multilayer three-dimensional structure, comprising supplying a multi-cell mask, wherein each cell is separated from other cells by a material, wherein each of a plurality of the cells of the mask each comprise independently controllable electrodes. The prior art of record neither teaches nor suggests a combination of limitations recited in the instant claims.

Application '574 claims a method for producing a three-dimensional structure comprising pressing the face surface of the mask against the substrate; after pressing, activating the current source to cause deposition of a first material onto the substrate in a deposition pattern; after said activating, relatively moving the face surface of the mask away from the substrate by a distance that is less than a distance that would cause separation of the mask sidewalls of the deposition sidewalls. Application '515 claims a method for producing a three-dimensional structure comprising bringing a mating surface of a contact mask and a mating surface of the substrate together, wherein initial contact between the mating surface of the substrate and a mating surface of the contact mask occurs in a controlled manner at only selected locations, and wherein continued relative movement between the mask and the substrate brings substantially all relevant mating surfaces of the mask into contact with the substrate; depositing the first material

onto the substrate with the contact mask in place; and separating the contact mask and the substrate to expose the at least one void. However, neither Application '574 nor Application '515 claim a multi-cell mask with each cell of the mask having an independently controllable electrodes.

Since the prior art of record neither teaches nor suggests the combination of steps recited in the instant claims, one skilled in the art would not have been motivated to perform the claimed process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
